

MASTERWORKSPACE  
INTERIORS FOR EVOLVING HUMANS

## COMPREHENSIVE SOLUTION FOR YOUR INTERIOR

# 5

## ADVANTAGES

- 15 years of experience in interior design, renovation, and furniture manufacturing
- Impeccable quality of work
- Highly qualified specialists only
- Precise project timelines
- Accuracy in engineering solutions

**MASTERWORKSPACE**  
INTERIORS FOR EVOLVING HUMANS

## WORK STAGES

- 1. Design and visualization**
- 2. Project documentation**
- 3. Approval of project documentation with the municipality**
- 4. Preparatory work and mobilization**
- 5. Demolition work**
- 6. Construction work**
- 7. Plumbing work**
- 8. Electrical work**
- 9. Ventilation and air conditioning**
- 10. Finishing work**
- 11. Furnishing**
- 12. Commissioning of all equipment**
- 13. General cleaning**
- 14. Project handover and warranty service**

**TURNKEY, STRESS-FREE, WITH MINIMAL YOUR  
INVOLVEMENT AND FULL ACCOUNTABILITY**

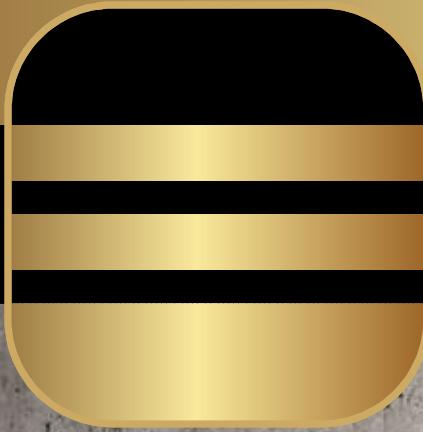

## Interior design project and 3D visualization of apartments and villas

An interior design project is a package of documents that thoroughly reflects the concept of the future interior.

It includes:

- Drawings: floor plans, electrical layouts, furniture, and plumbing arrangements.
- Visualization: 3D models and renders that help visualize the completed interior.
- Specifications: a list of materials, furniture, and equipment used.
- Explanatory note: a description of the concept, color schemes, and interior style.

**Full and partial project implementation.  
Renovation of residential and commercial spaces.**

We will assist you with **the full implementation** of your project based on your approved design plan. This is a comprehensive process that includes space zoning, plumbing, electrical work, carpentry, final finishing, as well as furniture and door installation.

We can also take on **partial project implementation** or renovate your space without a design plan

**Finishing work** includes numerous stages and types of tasks that prepare the space for living or use.

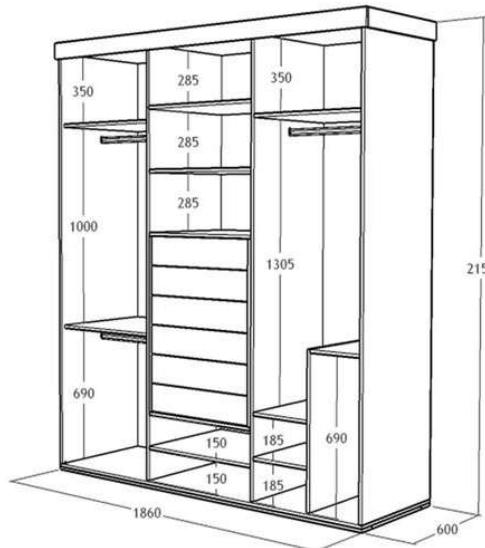

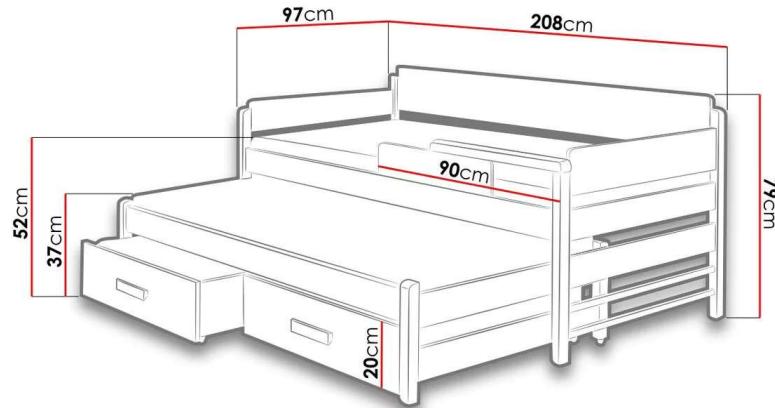

Here are the main types of finishing work:

**Rough Finishing:** Basic tasks such as wall demolition and construction, electrical wiring, floor screeding, soundproofing, plumbing, sewage, and heating system installation.

**Pre-finishing (White Box):** At this stage, electricity is connected to outlets, switches, and fixtures, plumbing and heating systems are operational, and walls, floors, and ceilings are leveled for final finishing.

**Final Finishing:** The concluding stage, including wall painting, flooring installation, baseboards, outlet fittings, lighting, and plumbing fixture installation.

**Turnkey Finishing:** A comprehensive set of works, including furniture assembly, kitchen set and appliance installation, and full cleaning of the premises.

## Custom Furniture Manufacturing

We have our own woodworking facility, which enables us to execute comprehensive projects for custom-built furniture, cabinetry, wall paneling, and interior doors. We utilize the most advanced technologies and only high-quality materials. Our professional team, with extensive experience, is always ready to bring even the most challenging ideas to life.

# Complex Construction and Finishing Solutions

## 1. Multi-level Ceilings:

Created using drywall or other materials, allowing for unique designs with varying levels and shapes.

## 2. Premium Flooring:

High-quality and exclusive materials for flooring, such as natural marble, parquet from rare wood species, or epoxy coatings with 3D effects.

## 3. Decorative Plasters:

Application of specialized mixtures to create diverse textures and effects on walls, such as Venetian plaster, microcement, or Moroccan Tadelakt.

## 4. Panel Systems:

Installation of panels made from various materials to create structural and decorative solutions on walls and ceilings.

## 5. Complex Lighting Systems

Utilizing different types of lighting to create a unique atmosphere and highlight specific interior elements.

## 6. Decorative Partitions:

Installation of partitions made from decorative materials like glass, metal, or wood for space zoning.

## 7. Smart Technology Integration:

Implementing "smart home" technologies for managing lighting, climate, security, and other systems via mobile devices.

## Warranty Service for Projects After Completion

### **Extended Warranty:**

We provide a long-term warranty period during which we take responsibility for addressing any defects.

### **Regular Inspections:**

Periodic evaluations and checks of the completed work to identify and resolve issues in a timely manner.

### **Quick Response:**

Prompt resolution of defects and problems related to the quality of work or materials.

### **Support and Consultation:**

Ongoing support and consultations throughout the entire warranty period.

### **Documented Coverage:**

All warranty obligations are recorded in official documents, ensuring transparency and confidence for the client.

### **Preventive Maintenance:**

We offer preventive maintenance services to extend the lifespan of completed work and prevent potential issues.
